

LankaCertify is the technology and consultancy services provider for on-line trust establishment and verification for eSri Lanka. The LankaCertify was formed to establish the complete technical, procedural and policy infrastructure to deploy digital identity products and services including on-line and off-line authentication of identities, verification of authenticity for digital objects and secure time-stamping. The LankaCertify digital certificate based products and services are designed to fully enable on-line applications in all areas including eGovernment, eCommerce, and eLearning. The primary products for secure and verifiable authenticity and trust management include eidentity, eSignature and eTimeStamp for individuals and organizations.
